The context

water is a precious natural resource which is essential for life on the earth. It is becoming scarce and valuable resource as population and water consumption rise and other side water resource management is being poor. That's why state government of Maharashtra launched a scheme '**Jalyukt shivar**' for the solving water problems in drought-affected villages. Water shortage is root of other problems. Such as, some of the villages of Beed district their peoples are facing drinking water problems in the summer session. Hence in this best practice to adopt the '**Fill half save half campaign**' initiative aimed at saving water at least Beed district. With the help of this best practices the college has been trying to saving water at city-based hotels – restaurants. And trying to creates awareness about the importance of water since least three years.

The practice

The college has initiatives for running this type of activities at college campus. Because, so many students are belonging from the rural area and they know the importance of drinking water as well as water uses. They are real victims of this problem. So, it's easy to found this problem to college and they also know, how to reduce this problem with the help of the students. That's why college has been working on that and trying creates awareness between hotels and restaurants customers which are located at nearby the college. Ours first year student going at hotel and restaurants and giving the information about the importance of water as well as stick their posters of 'Fill half save half campaign' which are run by the college since least three years.
