1.2 Concept of Gender Audit

Gender Audit is an attempt to evaluate whether the college possesses good gender balance. It is also an attempt to verify whether college meticulously observe and follow government rules, policies and actions formulated for up-gradation of women in society. The Gender Audit also study the impact of its current and proposed policies on gender equality.

Even though there is no standard approach for carrying out a gender audit, international organizations use two main approaches: participatory in gender audit and the gender integration framework.

The Gender Audit undertaken by the IQAC, Tulsi Computer Science & Information Technology College, Beed in collaboration with external and internal Committee Members. External Committee Member, Vice Chairman and Chairman impart their duties to scrutinize the gender balance within the institution and its practices and focused pre-determined objectives.

Specific Objectives of the Gender Audit:

1. To obtain fair state of gender balance in the college.
2. To sought accurate information about gender perception in college campus.
3. To Present and sketch out a road map for gender action.

Generic Objective of Gender Audit: -

integration. These four elements are positive political intention, technical efficiency, accountability and organizational culture.

Positive Political Intention:- means the initiatives in which the leadership within the college at different levels use their branches of the tree and are also required in equal measure to successfully integrate gender, position of power to communicate and demonstrate their support, leadership, enthusiasm for and commitment to working toward gender equality in the college.

Technical Efficiency:- Level of ability, qualifications and skills individuals in an organization need to carry out the practical aspects of gender integration for enhanced program quality, and level of institutionalization of gender equitable organizational processes.

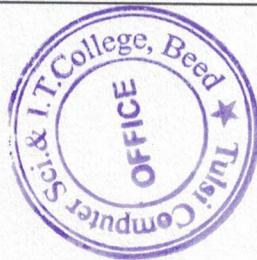

Accountability: Mechanisms by which a college determines the extent to which it is "walking the talk" in terms of integrating gender equality in its programs and organizational structures.

Organizational Culture: Norms, customs, beliefs and codes of behavior in an organization that support gender equality - how people relate, what are seen as acceptable ideas, how people are expected to behave and what behaviors are rewarded.

2: - Gender wise Data of the Institution

Gender sensitivity means an attempt to encounter and accept people without presumptions. Gender sensitive approach aims at opening, reconstructing and broadening expectations and behavioral models related to gender. Gender sensitive structures respond equally to men and women's specific interests without any presumption based on outdated views.

An audit of gender sensitive features in the Institution yielded the following notable points:

- Basic sanitation facility in the form of separate toilets for the students and staff is provided in the common area. Separate toilets for male and female faculty are available.
- There is a Ladies Common Room provided at ground floor of the main building.
- There are CCTV monitoring devices installed at different locations within the campus especially within the library and entry gates.
- There is a Women's Forum that conducts Gender Sensitization programmes regularly for the students.

2.1 State of Gender Balance in Institution

Gender balance underlines the existence of a fair ratio of male and female representation within the institution in terms of number of students in the various programmes as well as within the staff structure. The rationale is that traditionally women have lesser access to resources and opportunities due to the social structures which act as inhibitors to access. This results in lesser capability among women which in turn produces a snowball effect on their empowerment and access to development initiatives.

2.2 Gender wise details of the students in college

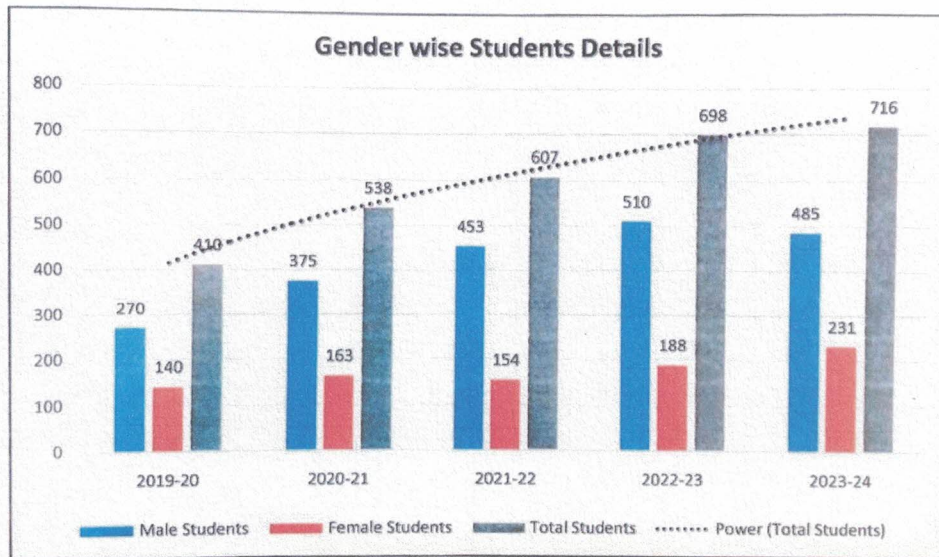

Student strength of the college represents the plans and policies observed by the institution. Composition of student strength and their demographic features underlines the on field results that college. When total number of students were categorized on the basis of their gender and compute their proportion, gender audit come to know about actual state of gender composition.
